

Architectural Studies (undergraduate)

Charles A. Dana Professor David Woolf; Professors Arthur Schaller and Aron Temkin; Associate Professors Wendy Cox, Eleanor D'Aponte, Matthew Lutz, Timothy Parker, Danny Sagan and Tolya Stonorov; Lecturer Cara Armstrong; Instruction Specialist Angelo Arnold.

Architecture is the art and science of the built environment: buildings, groups of buildings, communities, and their surroundings. As a profession, it is an art, science, and business with careers available in private firms, government, theater and film, industrial corporations, manufacturing, design, planning, public and private institutions, academia, and in architectural research.

The School of Architecture + Art fosters a natural and effective mentoring relationship between faculty and students. Courses take a balanced approach to both the art and science of architecture, embrace environmental sustainability and resiliency, and allows students to develop their own visions as designers.

A Bachelor's Degree in Architectural Studies is a four-year pre-professional program that prepares students for a one-and-a-half-year Master of Architecture program (accredited by the National Architectural Accrediting Board) offered at Norwich. It is an introduction to the profession, where students learn vital technical, artistic, design, and communication skills.

The architecture major will study in a studio environment that encourages creativity, critical thinking, independent learning, and the exploration of ideas through hands-on making. The studio environment in some ways resembles a large architectural office with 10 to 15 students assigned to one faculty member. The small size encourages both the exchange of ideas and intense effort. Studio encourages personal responsibility, teamwork, a sense of community, and a commitment to working on real-world problems. The integration of design build studios as well as close collaboration between our technical courses and design studios creates an education deeply rooted in practical solutions and technical invention. All students majoring in Architecture are required to spend a semester or summer studying abroad, which can most easily be accommodated at Norwich University's CityLab: Berlin.

For over 20 years, students have been addressing Vermont community needs through the design and construction of full-scale projects. Since 2011, we have produced 8 different affordable housing prototypes for northern New England's climate, construction methods, and communities. In addition, we have designed and built a day-camp and classroom building, a passive solar recreational facility, a mobile solar-powered geology lab, and a mobile classroom, design gallery, and resource center for the Vermont Chapter of the American Institute of Architects.

We offer our students the education necessary for the practice of architecture and art in their fullest sense: to design, make, and build in a way that embodies cultural meaning, employs technology wisely, and contributes to social and environmental justice. To this end, we seek to instill in students the core values of comprehensive knowledge, holistic awareness, continual innovation, active cooperation, and ethical responsibility through a balanced curriculum comprising observation, analysis, exploration, iteration, and synthesis, grappling throughout with abstract as well as concrete material, intellectual as well as hands-on experience.

We endeavor to contribute to the making of meaning and the meaning of making.

Goals:

Students (majors and minors) of the Architecture Program will:

- Be respected and recognized for technical competence in the creation of solutions that balance sustainability, resiliency, societal and economic issues.
- Acquire a range of capabilities that can be used at different scales of architecture projects, including residential design, small and large institutional project design, civic projects and urban planning projects.
- Help their communities by advocating and implementing good design principles at a broad range of scales.
- Communicate to both technical and non-technical audiences.
- Actively engage in continuing education throughout life.
- Be recognized for their leadership skills and their abilities to work with all people.

Outcomes:

Architecture majors and minors will:

- Gain a way of thinking, rooted in the iterative, test-and-learn approach to creativity and innovation.
- Learn to utilize techniques, skills, conventions, and modern digital and hand tools and techniques necessary for professional practice.
- Understand structural systems, heating and cooling systems, circulation systems, building systems, etc.
- Practice resilient and sustainable design.
- Learn materials and methods for construction.
- Prepare and deliver construction documents.
- Be trained in the ethics of the profession and learn to make ethical decisions.
- Function as a member of a multidisciplinary team and be able to assume leadership roles on the team.
- Understand and begin the process of architectural internship, training and registration necessary for the profession as well as the expectation for lifelong learning.

Careers for this Major:

- Private architectural firms
- Commercial, industrial, and retail design
- Facilities management
- Real estate and development
- Engineering
- Sales and manufacturing
- Government
- Industrial corporations
- Public and private institutions
- Academia

Accreditation:

Combined, the bachelor and master programs form a five-year professional degree accredited by the National Architectural Accrediting Board (NAAB), www.naab.org (<http://www.naab.org>), 1101 Connecticut Ave NW #410, Washington, DC 20036, phone, 202-783-2007.

TOTAL CREDITS FOR THIS MAJOR: 138-140			

³ Students who earn a grade of D+ or lower for two sequential, numerical, or chronological design courses (including AP 111 & AP 118) must repeat these courses and earn a C- or higher in both to advance to the next design level.

⁴ May substitute course for a Minor elective.

* During the Junior Fall or Spring semester, students must study abroad (preferably at CITY-Lab Berlin).

Minor

Architectural Studies Minor Curriculum Map 2019-2020 Catalog

- The minor in Architectural Studies is for students in other majors who are interested in studying the use and design of space for human work and habitation.

- A minor in Architectural Studies requires 20 credit hours, involving four designated courses and at least two others.
- All courses require a grade of C or higher.
