

Graduate Certificate in Cyber Law and International Perspectives on Cyberspace

Cyber Law and International Perspectives on Cyber Space Certificate

This certificate presents a comprehensive overview of ethical issues, legal resources and resources, and public policy implications inherent in the evolving online society. Complex and dynamic state of the law as it applies to behavior in cyberspace is introduced, and the pitfalls and dangers of governing in an interconnected world are explored. Ethical, legal, and policy frameworks for information assurance are addressed. Various organizations and materials that can provide assistance to operate ethically and legally in cyberspace are examined. Topics include intellectual property protection, electronic contracting and payments, notice to consent from e-message receipts, non-repudiation and cyber crime, and the impact of ethical, moral, legal, and policy issues on privacy, fair information practices, equity, content control, and freedom of electronic speech using information systems. It also provides an overview of the issues surrounding transnational cyberspace policies, international investment strategies and implementation of communication and information technologies that affect the global economy and transforms the flow of information across cultural and geographic boundaries. The certificate examines various global governance frameworks, and organizations that shape and transform cyberspace such as the International Telecommunications Union, the World Bank Information and Communications Technology Sector, and the U.S. Federal Communications Commission.
