

Graduate Certificate in Computer Forensic Investigation/Incident Response Team Management

This certificate is two 6 credit master's level courses. The topics covered include analyzing and applying the key points in creating and managing a computer security incident response team (CSIRT) also known as a computer incident response team (CIRT) or a computer emergency response team (CERT). Discussions of digital investigation and forensics cover topics from both technical and management perspectives to increase the information assurance professional's understanding and application of domain-specific knowledge.
