

Undeclared

The Undeclared major is designed for students who have a wide variety of backgrounds and interests and are considered capable of being successful with college-level programs. It is understood that entry as an Undeclared student will likely require more than four years to complete graduation requirements. Students will be given exposure to several areas of interest to move appropriately toward choosing a major. The Center for Student Success will advise the undeclared major and is overseen by the College of Sciences and Mathematics.

Undeclared students must indicate majors of interest; they will be admitted into the College that houses at least one of their majors of interest.

Students are required to declare a major prior to accumulating 45 attempted credits (this includes transfer credits). Students, who fail to declare a major prior to accumulating 45 attempted credits.
